1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

Box No. I Basis of the opinion

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
 - ☐ This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material:
 - ☐ a sequence listing
 - ☐ table(s) related to the sequence listing
 - b. format of material:
 - ☐ in written format
 - ☐ in computer readable form
 - c. time of filing/furnishing:
 - ☐ contained in the international application as filed.
 - ☐ filed together with the international application in computer readable form.
 - ☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

- 1 The following documents are referred to in this communication:

D1: US-A-4 070 152 (PENTZ ET AL) 24 January 1978 (1978-01-24)

D2: US-A-5 536 304 (COPPENS ET AL) 16 July 1996 (1996-07-16)

- 2 Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parenthesis applying to this document):
A polymeric product having oil repellent properties comprising an amino-functional polysiloxane (A) bonded through its amino groups to an addition copolymer (B) of (B2) an olefinically unsaturated monomer having a functional group capable of reacting with the amino groups of polysiloxane (A) (cf. D1, claim 1).

From this, the subject-matter of independent claim 1 differs in that (B) contains necessarily (B1) a fluoro-substituted alkyl ester of an olefinically unsaturated carboxylic acid.

The subject-matter of claim 1 is therefore novel over D1 (Article 33(2) PCT)

The problem to be solved by the present invention may be regarded as to provide a further polymeric product having oleophobic and oil repellent properties. The examples (cf. tables 1 and 2) show that the problem is solved by products of the claimed structural features (A)+(B1)+(B2).

There is no indication in the prior art, including D1 and D2, to synthesize polymeric products with the structural features (A)+(B1)+(B2).

The subject-matter of claim 1 is therefore inventive (Article 33(3) PCT).

3. The subject-matter of present independent claims 8-13 refers to a process for the preparation, a textile treatment composition and different uses of the silicone product of claim 1. Since the product as such is novel and inventive the process for its preparation and its use is as well novel and inventive.
4. Claims 2-7 are dependent claims and as such also meet the requirements of the PCT with respect to novelty and inventive step.
